Reviewers	v
Contributors	ix
Information for Authors	xi
In This Volume	xiii
1. Ecometrics: Toward a Science of Assessing Ecological Settings, with Application to the Systematic Social Observation of Neighborhoods	1
<i>Stephen W. Raudenbush and Robert J. Sampson</i>	
2. Simulating the Micro-Macro Link: New Approaches to an Old Problem and an Application to Military Coups	43
<i>Nicole J. Saam</i>	
3. A Goodness-of-Fit Test for the Latent Class Model When Expected Frequencies Are Small	81
<i>Mark Reiser and Yiching Lin</i>	
4. Algebraic Representations of Beliefs and Attitudes: Partial Order Models for Item Responses	113
<i>John Levi Martin and James A. Wiley</i>	

5. On a Relation Between Joint Correspondence Analysis and Latent Class Analysis	147
<i>Peter G.M. van der Heijden, Zvi Gilula, and L. Andries van der Ark</i>	
6. A General Class of Nonparametric Models for Ordinal Categorical Data	187
<i>Jeroen K. Vermunt</i>	
7. Testing Transitivity in Digraphs	225
<i>Martin Karlberg</i>	
8. Logit Models for Affiliation Networks	253
<i>John Skvoretz and Katherine Faust</i>	
9. A New Model for Information Diffusion in Heterogeneous Social Networks	281
<i>Vincent Buskens and Kazuo Yamaguchi</i>
